

Acoustic Energy presents its Aego M Speaker system

The Aego M active stereo Sub/Sat system was originally designed as an alternative to conventional "boxy" hi-fi loudspeakers, its purpose being to recreate true hi-fi sound in a more convenient, compact and elegant form.

In recent years the way we listen to music has been changing, making the Aego M an even more astounding product now! Simply plug in your music source of choice, be it an iPod™, PSP™, PC or even MP3 compatible mobile phone and crank the volume for breathtaking full-scale sound in any room of the house.
